MSU Breast Center

The MSU Breast Center first opened as the Comprehensive Breast Health Clinic in January of 1992. The center is a division of the Department of Surgery. The mission of our center is to provide comprehensive, specialized breast health care to women and men in a sensitive and personalized manner. Our providers utilize state-of-the art skills and techniques to provide a wide range of services such as genetic counseling and testing, breast cancer high risk assessment, and breast surgery.

MSU Surgery provides patients peace of mind through our successful outcomes which are supported by our:

- Fellowship training
- Board-Certified General and Plastic and Reconstrutive Surgeons
- Number of cases performed
- Comprehensive care from our highly skilled team

The MSU Breast Center clinical staff:
Kimberly - RMA | Nanette - Surgery Scheduler
Pam - RN, Nurse Navigator | TJ - CMA

Mission Statement

To provide evidence-based integrated surgical care that exceeds national benchmarks for quality and safety, educate the next generation of surgeons and scholars based on learner-centered principles, and advance medical knowledge through basic, clinical, and translational research to improve the lives of surgical patients.

MSU Surgery
Eyde Building
4660 S. Hagadorn Rd, Suite 600
East Lansing, MI 48823

what breast imaging would be appropriate for you.

will devise a plan for following up in the clinic as well as clinical breast exam, and the nurse practitioner and you at your visit you will receive educational information, a future.

developing breast cancer, or to diagnose the cancer in an education and monitoring to aid in reducing their risk of patients who are at a higher risk for breast cancer.

dr. bumpers has a dedication to community outreach regarding breast cancer and has done workshops for the community every year since 1988.

For the past 25 years, he has also been committed to laboratory research on breast and colon cancers. Dr. Bumpers also is a reviewer for multiple cancer journals and avidly publishes on breast cancer diagnosis, treatments and biological resesarch. He serves on panels and performs grant reviews at the National Cancer Institute in his role as a national health disparities expert related to breast cancer.

The high-risk breast clinic provides patients who are at a higher risk for breast cancer with education and monitoring to aid in reducing their risk of developing breast cancer, or to diagnose the cancer in an early stage.

During your visit you will meet with a board-certified nurse practitioner to address your breast concerns, review your personal and family history, and to assess what the overall risk of developing breast cancer in the future.

At your visit you will receive educational information, a clinical breast exam, and the nurse practitioner and you will devise a plan for following up in the clinic as well as what breast imaging would be appropriate for you.

Mary Smania, DNP, FNP-BC

GENETICS | Mary Smania is an Assistant Professor in the MSU College of Nursing. In addition, she is a certified nurse practitioner and certified advanced genetics nurse at MSU Breast Center.

She has over 20 years of experience in women’s health and in all aspects of breast health including breast cancer, genetic testing, evaluating benign breast disease and women at risk. She is nationally recognized and presents in various forums including community groups, nursing and physician audiences. She was selected as Nurse Practitioner of the Year in 2015, received the Community Service Award from the Lansing State Journal Salute to Nurses in 2018, and received the Oncology Nursing Society Excellence in Cancer Prevention and Early Detection Award in 2019. She has various publications related to breast health. She is currently the Program Director for a Susan G. Komen® grant and has received nine previous Komen grants providing breast services to the underserved.

Michelle Andersen, DNP, FNP-BC
